TRAFFIC DETECTION - DATA COLLECTION

A CRITICAL COMPONENT TO CREATING SMART WORK ZONES

	WB I-10 Doppler 05	57 mph	12.54 V
	WB I-10 Doppler 06	12 mph	12.59 V
	WB I-10 Doppler 07	14 mph	12.20 V
	WB I-10 Doppler 08	34 mph	12.37 V
	WB I-10 Doppler 09	63 mph	12.67 V

TYPES OF DEVICES	DETAILS
Bluetooth/WiFi	Collects travel time information
Radar Speed Sensors	Single radar used to collect vehicle speed information
Radar Data Collection Sensors	Dual radars used to collect vehicle speed, volume, classification, gap, and headway
Presence Detection Sensors	General detection of movement in a specific area
Video Detection Sensors	Isolate areas for data collection counts

TRAFFIC DETECTION - DATA COLLECTION

NATIONWIDE LEADER IN SMART WORK ZONES

Having been involved with Smart Work Zones since its inception, Street Smart has been part of more deployments than anyone in the industry.

- ✓ If you are looking for information about Queue Warning Systems, Portable Cameras, Portable Traffic Sensors, etc...we are here to help.
- ✓ We'll partner with you to create and/or review SWZ plans & specifications
- ✓ Provide you with competitive pricing for turn-key deployment
- ✓ Deliver necessary SWZ equipment and supplement your fleet as applicable
- ✓ 24/7 Support & monitoring of SWZ from pre-con to project completion

BlueTOAD® Spectra Bluetooth

BlueTOAD® is the most advanced traffic-monitoring system on the market, directly measuring travel times using cost-effective, non-intrusive roadside technology.

Traffic Detection Trailers

Radar traffic detection trailers are environmentally friendly platforms that can be used for a variety of applications and can assist in your Intelligent Transportation Systems and data collection needs.

Speed-Mac

Highly portable sensor system packaged into a standard barricade light for seamless integration into work zones for Queue Warning Systems, traffic studies, and more.

Houston traffic collector speed radars

Lowest power industry standard radar for speed measurement. Directional pick up of either incoming or outgoing vehicles/objects. Collect speed, volume, and vehicle class.

Wavetronix Smart Sensor HD

Wavetronix Smart Sensor HD is a robust sensor that can provide precise data in varied weather conditions.

iCONE®

The iCONE is a traffic sensor integrated directly into a standard traffic barrel for seamless integration into work zones for all sensor-related applications.
